

Profile

Like most "computer geeks" I have a strong passion for all areas of web technology. Having years of both creating and maintaining websites/applications under my belt for a wide variety of clients has given me experiences that are extremely valuable in any working environment. From scripting and deploying websites in various fields, to maintaining servers and now working in mobile platform solutions - I have constantly worked to expand my knowledge of web technologies. My main goal is to support great design with solid code "under the hood."

My main areas of expertise are: PHP (Laravel), MySQL, Javascript, HTML5, CSS and Nginx.

SR. PHP DEVELOPER, ANODE, INC – 2012-PRESENT

Working as a Sr PHP developer at a creative studio in Nashville, TN. Primary responsibilities include working with a creative development team to deliver interactive experiences for museums, libraries and schools.

- Developed custom backend powering exhibits for the Country Music Hall of Fame with the Laravel framework
- Created iPad application for CMHoF interactive
- Worked on interactive exhibits for other libraries and fortune 500 companies

SR DEVELOPER, POPVOX, INC – 2013-PRESENT

Currently working as a Sr PHP developer at a civil action startup out of Redwood City, CA.

- Rebuilt previous Python based site with the Laravel framework
- Currently creating new functionality that hadn't existed before on the previous site - such as live feeds using websockets and real time updates delivered to users on bills, congress members or other members they follow.

WEB/TECH SPECIALIST, TAGTEAM GLOBAL – 2010-13

All things web related. Primary responsibilities included building custom content solutions for companies like Mars Inc. and GE Capital, as well as maintaining and supporting all company websites.

- Developed custom standalone kiosk for Mars internal communications
- Developed file sharing and catalog solution for Mars Global
- Developed iPhone mobile application for Mars internal communications
- Various other sites for our clients
- Ongoing support for applications

WEB DEVELOPER - INDEPENDENT – 2007-10

Worked as a contract hire for several different companies. Complete backend design and development; created several custom CMS solutions. Served as a consultant for implementing web services and programming direction.

Education

Communications, University of Memphis, TN - 1993 – 1995

Skills

Proficiency in PHP and the Laravel framework. Actively involved in professional development work for the last 11 years.

Proficiency with MySQL and writing SQL queries.

Proficiency in native JS and jQuery. Familiar with both RequireJS and CommonJS standards. Able to write modern HTML5 and CSS3.

Have built applications for mobile devices using Appcelerator Titanium Studio as well as Sencha Touch. Have also built mobile web sites using jQuery touch and the Bootstrap framework.

Excellent understanding of Nginx/Apache Web Server. Deployment of full stacks from the command line.

Proficient knowledge of Photoshop, generally from PSD to HTML conversion and website layout.

Extensive knowledge in wireframing and user interface design. Have used Balamiq Mockups to design many user interface layouts.

Have built custom sites using: Laravel, Wordpress, Drupal, MODx. I've also written several custom CMS solutions using both raw PHP, Laravel and the Codeigniter framework.

Everyday Development Environment

Computer: iMac and MacBook Pro

Editor: PHPStorm and Sublime Text 3

Server: Unix/Nginx/PHP/MySQL

FTP Client: Transmit

MySQL GUI: Sequel Pro

Cloud Services: AWS

Javascript and LESS/SaSS compiler: Gulp
